

Myriad Complete™

Myriad Complete is a customizable suite of services and workflow solutions designed to simplify germline testing without added cost to the clinic or patient

- End-to-end solutions that save you time and reduce workflow burden
- Customizable based on your unique clinic needs
- Helps you confidently identify patients based on the latest cancer treatment guidelines
- Seamlessly integrates into your current clinic workflow
- Dedicated clinical support is a phone call away for physicians, staff, and patients

1 Patient identification

Tools to help identify patients who meet germline testing guidelines to inform treatment decisions

3 Ordering

Easy ordering options including paper, online, virtual, and EMR

5 Results

Comprehensive, clear, and easy-to-follow results so you can focus on patient treatment

2 Pre-test education

Live, point-of-care sessions with a Certified Genetic Counselor which includes chart notes, a family pedigree, and an educational video

4 Affordability

Transparent pricing with personalized cost estimates, financial assistance, and other affordability options including direct pay

6 Post-test consults

Scheduled or on-demand results consults with Certified Genetic Counselors (includes chart note)

A team of real people behind every test

Myriad's Patient Education Program

Myriad's **Patient Education Program** is an optional service that gives patients access to phone-based education sessions with Myriad's Certified Genetic Counselors. Each session is highly personalized to meet your patient's needs.

- Provides a comprehensive and personalized educational experience for your patients
- Reduces errors in collecting essential information needed to complete the Test Request Form
- Customizable based on your unique clinic needs
- Live, on-demand and scheduled post-test consults ensure patients understand their results and next steps

“Now my patients understand more... conversations take less time and are higher quality.”
